

Registration Procedures:

- a. Deposit the Registration fee of **USD \$10.00** per head at any BPI branches.

Bank name: BPI Bank	Account name: MTG, Philippines	Dollar Account no.: 2114 - 0276 - 88
-------------------------------	--	--

- b. Write your information on the original deposit slip with the following: (Please write legibly. Avoid using longhand writing)

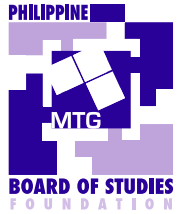

1. Complete Name of participant (all caps)
2. Grade/Year level (SY 2017-18)
3. Complete School name: (no Abbreviation)
4. Contact No. of participant
5. MTG Center/City/Region

- c. Failure to write the needed information on the deposit slip will be considered void.
- d. Send the original deposit slip with complete information to:

MR. JAMAL TEBBENG
#700 Alvarez Subdivision
Pilar Street, Zamboanga City 7000
Tel. No.: (062) 992-0953

Note:

1. See to it that you must have a photocopy of your deposit slips for future reference.
2. Do not assume that once payment has been made, your entry will be automatically registered in our data bank. We will only process and include your name as an official participant in the 2018 PKMC only when we receive the original deposit slip with complete information before the deadline and not during the contest day.
3. No walk-in participants are allowed on the contest date to take the 2018 PKMC. Registration fee will not be refunded once payment is made.

International Kangaroo Mathematics
Competition - Philippines

Registration ends: February 28, 2018

Contest Date: March 17, 2018

International Kangaroo Math Competition (IKMC)

The International Kangaroo Math Competition (IKMC) is an international school-based mathematics competition organized by the Association Kangourou Sans Frontieres (AKSF) a transnational educational group based in Paris.

The competition began to be called “Kangaroo” because of its Australian origin. Founded in early 1980, the KMC quickly spread throughout Europe is currently the world’s largest math competition with more than 6 million participants from 80 countries in 2017.

Most of the well known math experts from more than 70 countries around the world contributed the contest problems. They have their doctoral degrees from most prestigious universities of the world. A large number of universities worldwide is directly supporting this contest. Most valuable asset of this contest is that dozens of National Mathematical Societies, research institutions and several Math Trusts, including UK Math Trust, are very proud to support International Kangaroo Mathematics Competition.

This competition has won several international prestigious prizes including Paul Erdos Prize which was given to IKMC because of its extreme usefulness for enhancing the quality of education in schools. This makes IKMC a competition with the strongest academic values.

The Philippines through Mathematics Trainers’ Guild (MTG), Philippines and Philippine Board of Studies Foundation (PBOSF), Inc. had been officially accepted as member of the ASKF during the 2017 Annual ASKF Meeting held in Lucerne, Switzerland on October 11-15, 2017.

The MTG Philippine will officially open the registration of the International Kangaroo Mathematics Competition - Philippines (IKMCPH) on January 10, 2018 to the different public and private school students in the country.

The Objectives of the Kangaroo Math are to:

- encourage students to master their mathematical knowledge and skills.
- give them confidence in their ability to understand mathematics.
- help them recognize how to apply mathematics in their daily life activities.
- develop their ability to derive pleasure and satisfaction through intellectual life.
- show that mathematical education is significant in every part of the world.

Our vision is to promote greater commitment to improve the mathematical skills of the students, develop their higher order thinking skills and use good and interesting problems solving approaches. Likewise, we encourage academic excellence in mathematics through awarding Filipino students who compete in the PMKC.

Why should one choose International Kangaroo Mathematics Competition - Philippines (IKMCPH)?

The contest problems are provocative, require great deal of attention and creative thinking, and cover interesting mathematical concepts. They aim to show the beauty of mathematics and, thus, increase the appreciation of mathematics. We believe many children are not challenged enough in the school system. This is why we offer mathematics enrichment programs accessible to all children. Even challenging mathematics can be taught in interesting and fun way!

Are you interested to join the IKMCPH?

Kangaroo Math is a multiple-choice 75-minute test. The questions have the form of word and/or picture problems. They are prepared by the Association Kangourou sans Frontières - which meets annually to propose questions for the next Math Kangaroo test for students in more than 70 countries.

Among the prizes are some Kangaroo items, High Distinction, Distinction, Credit and Merit certificates. The TOP SCORERS for each level will receive medals.
